

Medical articles on Wikipedia receive 10 million daily views, and Wikipedia's top 500 skin-related articles received more than 16 million views during August 2018 alone. An editing partnership between the evidence-based medicine organization Cochrane (www.cochrane.org) (<http://www.cochrane.org/>) and Wikipedia was initiated in 2014. Cochrane Review Groups, Centers, and Fields engage with Wikipedia to recruit and train editors and share high-quality Cochrane Review evidence in Wikipedia articles. This research letter evaluates the most-viewed dermatologic articles on Wikipedia and describes the impact that trainees and dermatologists volunteering for the Cochrane Skin Wikipedia Initiative can have by enhancing the content of Wikipedia articles.
