

# Firearm Storage Maps: A Pragmatic Approach to Reduce Firearm Suicide During Times of Risk

Timothy Kelly<sup>1</sup>, Sara Brandspigel MPH<sup>2</sup>, Evan Polzer MA<sup>1</sup>, Marian E. Betz MD/MPH<sup>1</sup>

<sup>1</sup>University of Colorado School of Medicine, Department of Emergency Medicine, Aurora, CO

<sup>2</sup>Program for Injury Prevention, Education & Research, Colorado School of Public Health

## Background

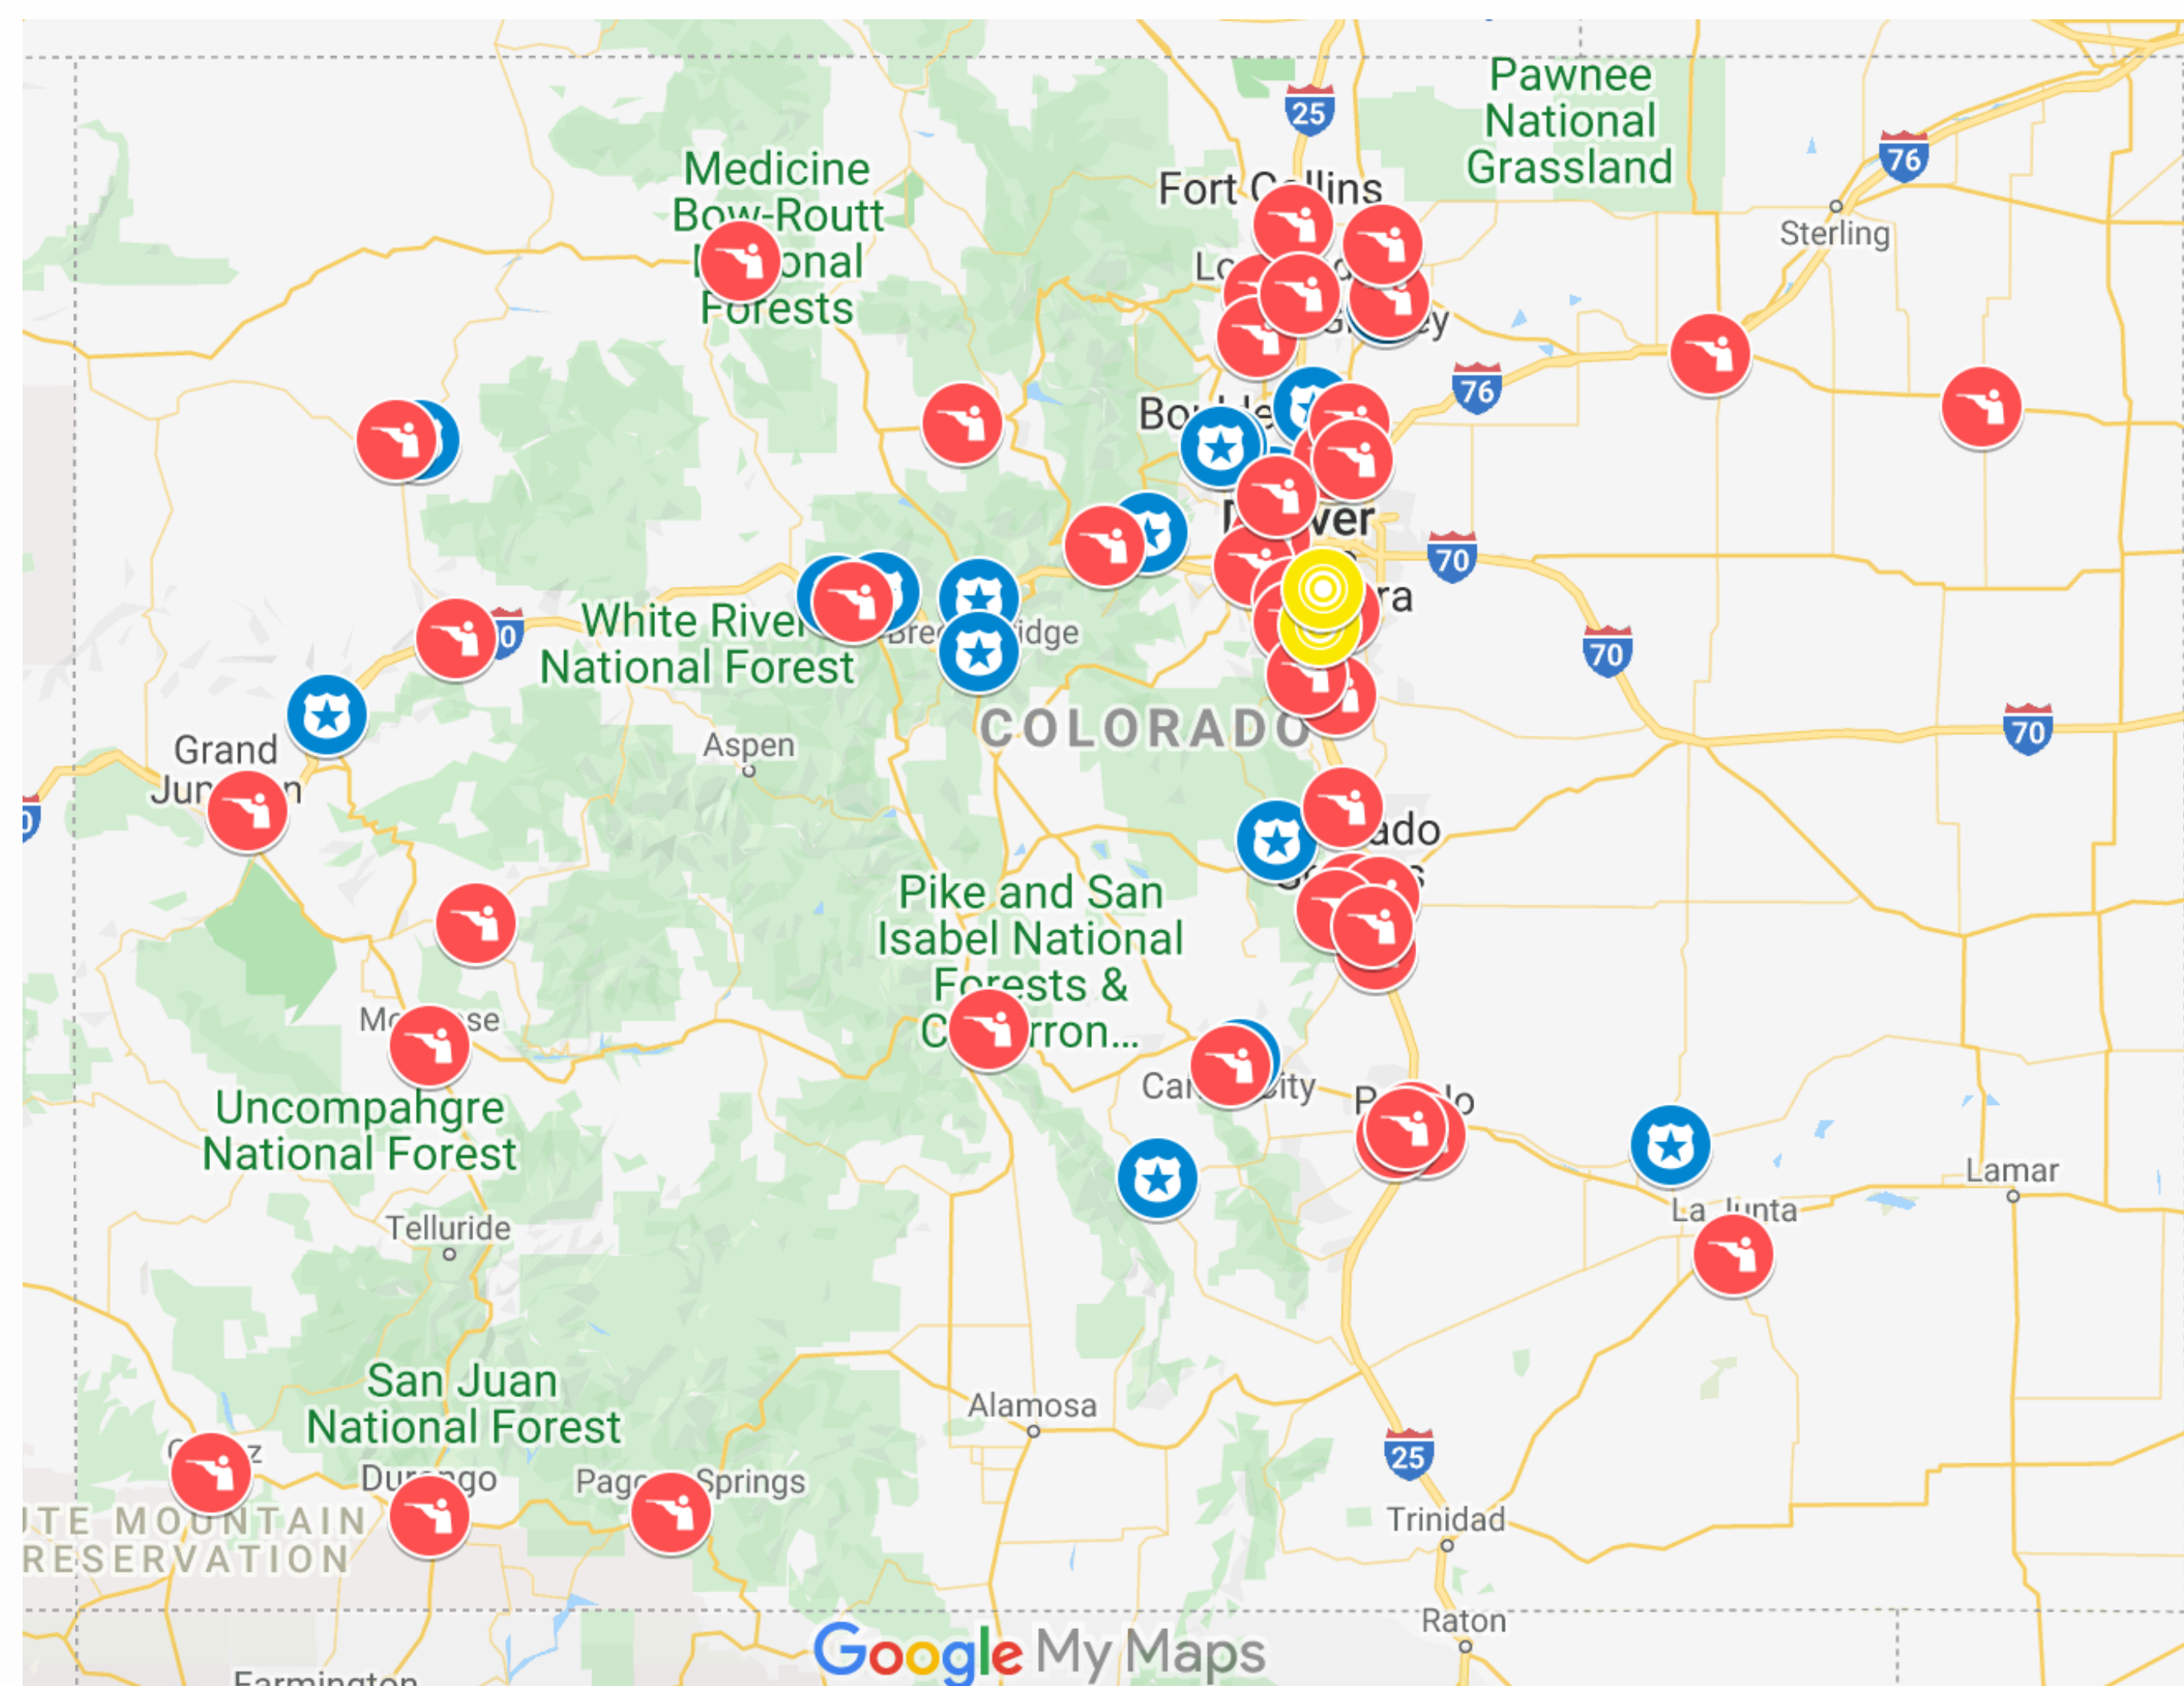

- Firearm ownership is associated with firearm suicide.<sup>1</sup>
- Temporary out-of-home firearm storage, or lethal means counseling, is an evidence-based strategy to prevent firearm suicide.<sup>2</sup>
- Colorado has one of the nations highest suicide rates and firearms are involved in more than 50% of Colorado suicides.<sup>3</sup>
- There are substantial practical barriers towards finding options for out-of-home gun storage during periods of suicidal crisis.<sup>4</sup>

## Methods

- The authors sought to create the first-of-its kind online map that lists locations that consider requests for voluntary firearm storage during periods of personal crisis.
- Gun shops and law enforcement agencies (LEAs) were contacted on behalf of the Colorado Firearm Safety Coalition, a non-partisan organization of physicians, public health practitioners, and gun shops owners committed to gun safety and suicide prevention.
- Colorado gun shops were aggregated through a targeted Google Maps search for 'gun shop(s),' 'firearms,' 'armory,' 'shooting range,' and 'firing range.'
- LEAs were identified through a purchased registry from Dunn & Bradstreet.
- Gun shops were contacted twice via phone during normal business hours.
- LEAs were contacted twice via email.
- The online map resource was built with publicly-accessible Google Maps software.

## Online Map Resource

### Legend

Red pin = gun shop; Blue pin = LEA; Yellow pin = other

## Results

- 471 gun shops and 215 LEAs in Colorado were contacted.
- In total, 61 locations agreed to be listed on the map.
- 46 (10%) of contacted gun shops and 15 (7%) of contacted LEAs agreed to be listed on the map.
- Since publication, 5 additional locations have asked to be added to the map.
- 32/64 (50%) of Colorado counties now have a listed location for temporary gun storage

## Impact

- The online map has been viewed more than 37,000 times since publication in August 2019.<sup>5</sup>
- The map has been featured in numerous Colorado news outlets including *The Denver Post*, *The Colorado Gazette*, CPR, and KUNC.
- 11 other states are currently in the process of establishing gun storage maps for their states.
- Washington and Maryland recently became the 2<sup>nd</sup> and 3<sup>rd</sup> states in the nation to launch gun storage maps.

## Conclusions

- Gun storage maps are a feasible approach to support lethal means counseling to reduce firearm suicide.
- Individual agencies or organizations can reasonably create gun storage maps on their own.
- Numerous barriers remain to temporary, voluntary out-of-home gun storage including concerns about liability, cost, and logistical ease.
- Future gun storage projects may benefit from increased legal clarification regarding the temporary transfer of firearms.
- Future research is needed to establish the exact impact that firearm storage maps have on firearm suicide.

## Acknowledgments

Participating Colorado gun shops and law enforcement agencies, the Colorado Firearm Safety Coalition.
