

Description of Research	<p>Dr. Anthony's current research is focused on testing and implementing new treatments to improve executive functioning (EF) in children with ASD and ADHD, particularly those experiencing disparities. She is a co-developer of the school-and home-based intervention Unstuck and On Target (UOT). This intervention gives teachers, parents, and special educators training and ready-to-use lessons that promote cognitive and behavioral flexibility in everyday situations. This work is</p> <p>She is also a senior member of the team that is building expertise in gender diversity in ASD in 3 groundbreaking papers, as well as gender disparities in ASD measures. She is also currently a Co-Investigator on a NIMH funded Autism Center of Excellence study investigating sex and gender differences in ASD symptomatology and longitudinal brain development during the transition from adolescence to adulthood.</p> <p>She has expertise in specialized training and research experience using participatory research methods to develop interventions and to create new effective measures, qualitative data analysis and mixed methods designs. She recently joined the University of Colorado ACCORDS Dissemination and Implementation Program.</p>
Methodology	Clinical Trials, Community Based Participatory Research, D & I
Clinical and special developmental populations	Autism, ADHD, Executive Functioning, Children and Youth
