# Experiences for the DAISY/TEDDY/ASK Cohorts

Michelle Hoffman, RN

Research Instructor

Patricia Gesualdo, RN, MSPH

Senior Research Instructor

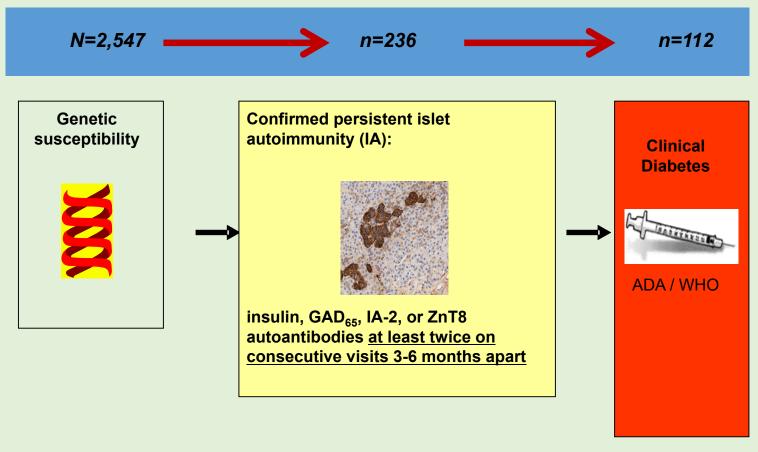

Kimberly Bautista, MPH

Research Instructor

## **Experiences from Follow-Up**

- Study Overview
- Case Review
- Challenges and Successes
  - DAISY: Michelle Hoffman
  - TEDDY: Tricia Gesualdo
  - ASK: Kim Bautista
- Lessons Learned

## Development of islet autoimmunity and T1D DAISY 1993-2022

## Case Review #1: FDR, MAB+

- Male enrolled at birth
   Non-mispanic White
- HLA DR X/X (low risk)
   Dual participant DAISY/ TrialNet (Oral Insulin arm)

RMJ2

#### **Diagnosis:**

- Age 20.5
- In Clinic RG 167 asymptomatic
- A1c 6.9

#### Referred to BDC Adolescent Clinic

- Home glucose testing (HGT) X 1 week
- Random glucoses <u>></u>200
- Developed decreased energy, increased thirst

RMJ0 Enrolled at birth

Rewers, Marian J, 2022-11-06T14:33:32.139

**RMJ1** Unclear which clinic - BDC? Primary care?

Rewers, Marian J, 2022-11-06T14:34:31.185

**RMJ2** Please emphasize that while the two cases may not be typical of "childhood diabetes' you picked them to illustrate that:

- 1) islet autoantibodies can develop after 15
- 2) T1D diagnosed in young adults starts as ilet autoimmunity in childhood

Rewers, Marian J, 2022-11-06T14:50:34.439

## Challenges

- <u>Protocol</u>: CGM difficulties, dual participation
- <u>Life Complexity</u>: busy life, scheduling difficulty
- Avoidance: Home glucose testing

## Successes

- Staff Support/Trust in Research: Persistence in contact attempts, clinician consistency
- <u>Knowledge</u>: Accurate risk perception, fam hx T1D
- Access to study: Lived locally throughout study
- Tools to Monitor: HGT supplies

## Case Review #2: FDR, MAB+

Female

- Non-Hispanic White
- HLA DR 4/4 (moderate risk)
- Refused dual participation DAISY/TrialNet

#### **Diagnosis:**

- Age 22.3 y
- Moved home post-graduation
- Parent noted symptoms immediately
  - Weight loss, polydipsia, polyuria, lack of energy
  - Home glucose 460
- ER glucose 485, A1c 12.2
- No DKA

## <u>Challenges</u>

- Family Dynamics:
  - Difficult relationship with diabetic parent, Transition from parentdirected participation to independent
- Personal:
  - Body image disturbance
  - Denial/invincibility
- <u>Protocol Adherence</u>: Refused OGTTs/CGMs, home glucose testing
- <u>Life change</u>: Move out of state, refused long distance participation

## <u>Successes</u>

- <u>Family Dynamics</u>: Maternal Involvement
- Staff Support/Trust in Research: Relationship with staff, social Work and dietician involvement
- Tools to Monitor: Provided testing supplies, frequent reminders to test

8676 enrolled n=858 n=438

1368 enrolled (Colorado) n=130 n=79

#### Case Review #1

- 8yo FDR female
- IAA+ at 21months
- 6-12 month gap between visits
- No OGTTs; home glucose unknown
- At Dx: HbA1c 7, no symptoms/No DKA

#### Case Review #1

#### Challenges

#### **Behavioral:**

- Needle phobia
- Generalized anxiety disorder/OCD

#### Family:

- 2 young children in TEDDY
- Parents work full-time

#### Study protocol:

- Infrequent TEDDY visits
- Travel to BDC

**Successes** 

**Staff Support:** 

consistency/persistence

Family: Probable intuition at dx

**Tools to Monitor:** 

Pediatrician involvement

#### **TEDDY Case Review #2**

- 16 yo male: GP
- Long distance protocol
- Withdrew at 3 years
- Re-enroll at 14.5 years
  - GAD and IAA +
- Completed TEDDY at 15 years
- Enrolled in TEDDY Grad
- Current HbA1C 5.7

#### Split in 2 slides and follow DAISY template Rewers, Marian J, 2022-11-06T15:07:36.330 RMJ0

#### Case Review #2

#### Challenges

**Location**: Lives in Michigan: LDP lab

#### **Study protocol:**

- 11 year gap in participation
- Underestimation of risk
- Minimal connection to TEDDY Staff
- "I've never met anybody from the TEDDY program"
- No interest in TrialNet

#### Family:

- Teenager
- Sibling now AB+

#### **Successes**

#### **Study protocol:**

Ab testing before the 15 year visit

#### Family:

- Involved parents
- Sibling tested in ASK and AB+; referred to ASK the Experts

# Autoimmunity Screening for Kids (ASK) Education and Monitoring Denver, Colorado

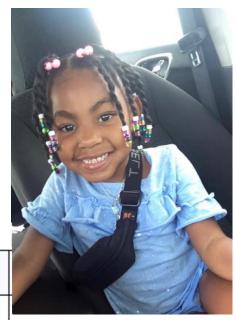

## Case Review #1 GP, MAB+

- Demographics
  - African American, female, screened at DH East Side clinic
- Screened at the age of 2y9m and DX at 6y3m
- DX Info: 4/2021, HbA1c 7.0%, home BG 319, no sx, no DKA

#### **T1D Antibodies**

#### Challenges

- Behavioral: Blood draw anxiety/needle phobia
- <u>COVID:</u> Unresponsive
- <u>Life Change</u>: New baby=nonadherence to HGT

#### Successes

- Staff Support/Trust in Research: Persistence in contact attempts, clinician consistency
- Knowledge: Accurate risk perception
- Action: Response to contacts/timing

### Case Review #2 GP, MAB+

- Demographics
  - Hispanic, male, screened at CHC South
- Screened at the age of 8y10m and DX at 10y5m
- DX Info: 4/2021, HbA1c 5.7%, home BGs 229 & 277, polyuria and polydipsia, no DKA, COVID at time of dx so dx completed via telemed

<sup>\*</sup>Came in for a clinic visit Jan/2019, refused bd, but wore CGM

## OGTT, CGM & A1c Results

| Date          | Protocol | Result   | Fasting<br>BG | 2h BG | Time >140 | Peaks<br>≥200 | Average glucose | A1c                      |
|---------------|----------|----------|---------------|-------|-----------|---------------|-----------------|--------------------------|
| Jan<br>2019   | CGM      | Normal   |               |       | 10%       | No            | 116             | BD<br>skipped,<br>no A1c |
| March<br>2021 | OGTT     | Impaired | 106           | 152   |           |               |                 | 5.7                      |
| March<br>2021 | CGM      | Impaired |               |       | 33.9%     | Yes           | 137             | 5.7                      |

#### Challenges

- Behavioral: Blood draw anxiety/needle phobia
- <u>Family Dynamics</u>: Parental substance abuse and domestic violence
- <u>Life Change</u>: Parent incarcerated

#### **Successes**

- <u>Staff Support</u>: Persistence in contact attempts/Clinician Consistency
- Family: Mat GMA became guardian
- <u>Tools to Monitor</u>: Home glucose teaching
- **Knowledge**: Accurate risk perception
- Action: HGT adherence

### Lessons Learned

- Each study has informed the next
- Guided development of large-scale screening and monitoring efforts
- Important to keep reaching out using various methods
- Meet families where they are, to discover what monitoring activities are most feasible for them.
- Even when we think families aren't "hearing" us, they are...
- Staff trained and experienced in early T1D monitoring
