*******EMBARGOED UNTIL 10 A.M. PDT ON MONDAY, MAY 16*******

Kate Coleman-Minahan joins Betty Irene Moore fellowship program at UC Davis nursing school

Fellowship Program Recognizes Nursing Innovators

AURORA, Colo. (May 16, 2022) – Kate Coleman-Minahan, PhD, RN, FNP-BC, assistant professor at the University of Colorado College of Nursing is one of 12 nurse scientists accepted to the third cohort of the [Betty Irene Moore Fellowship for Nurse Leaders and Innovators](#). This fellowship program, funded by a \$37.5 million grant from the [Gordon and Betty Moore Foundation](#), recognizes early- to mid-career nursing scholars and innovators with a high potential to accelerate leadership in nursing research, practice, education, policy and entrepreneurship.

As part of the three-year [fellowship program](#), fellows receive \$450,000 to conduct an innovative project or study with the potential to address a gap in knowledge, meet a vital need, alter care delivery or design a new solution to advance health. Minahan's project focuses on advancing reproductive justice among immigrant young adults: shaping the future of reproductive health.

“We are so thrilled for Dr. Coleman-Minahan to be recognized for her work and be included in this fellowship program. She is truly an innovator in the nursing profession and a rising star,” said Dean Elias Provencio-Vasquez, PhD, RN, FAAN, FAANP.

In addition to the project, the fellowship program features a hybrid online and classroom curriculum designed and taught in partnership with the [UC Davis Graduate School of Management](#) to enhance leadership and innovation capacity, strengthen strategic thinking and collaborative skills, expand professional networks, develop entrepreneurial skills, and propel innovative ideas to fruition. A mentor selected by the fellow and an additional mentor provided by the national program office round out the educational experience.

“Our fellows undertake a unique journey in which they get to explore and better understand their roles as leaders and how they can influence health systems to include more equitable and higher quality care for all the populations they serve,” said [Heather M. Young](#), professor, as well as dean emerita of the school, who now serves as national program

director for the fellowship. “This next generation of nursing leaders has great potential to have a nationwide impact on healthy equity and health care delivery.”

The fellowship program is made possible by [Betty Irene Moore’s](#) passion to advance nursing with the goal of better outcomes for individuals, families and communities. The foundation seeks to prepare nurses as collaborative leaders with the skills and confidence to inspire others, enact change and challenge the status quo. With the creation of the Betty Irene Moore Fellowship for Nurse Leaders and Innovators, the foundation supports nurse leaders who take ideas to scale that advance high-quality, high-value care and optimal health outcomes.

Applications for the 2023 cohort of nurse leader fellows open Sept. 23 with a submission deadline of 5 p.m. PST Dec. 1. To learn more, visit the [School of Nursing website](#).
