

March 30, 2021

**To:** Interested Applicants University of Colorado, Anschutz Medical Campus Research Program in Environmental Health Sciences (CUrehs.Program)

**From:** Drs. Jared Brown and Alison Bauer  
Directors, CUrehs Program  
University of Colorado, AMC Campus

**Re:** CUrehs Research Program

**Deadline:** April 1<sup>st</sup>, 2020

A paid year-round research program opportunity is available for 6 undergraduate students who are underrepresented in the health sciences (defined in the application below) to participate in a mentored research program at the University of Colorado Anschutz Medical Campus. The program is focused on training students in the environmental health sciences. This includes research opportunities in biomonitoring of environmental exposures, genetics of environmental lung diseases, nanotechnology health and safety, environmental causes of cancer, effects of chemical warfare agents and inhaled pollutants. The program is full time during the summer (40 hrs/week) and part-time during the school year (~10 hrs/week). Students in their Sophomore to Senior year are eligible.

The stipend is \$12 per hour. You will be required to select a mentor based on research interests, develop a research project, complete the project, provide a final report and present a poster at a graduation luncheon. Students are strongly encouraged to find a research mentor from the list of available faculty. Drs. Brown and Bauer will assist students in the selection of research mentors.

Drs. Jared Brown or Alison Bauer will be happy to help you with any of these aspects or answer any questions.

Thank you for your interest in the CUrehs program.
